

## REQUIRED INSTALLATION OF SATELLITE DISH

July 2009

Dear Homeowners Residents:

Place the satellite Dish on the backside of your carport.

Attach Dish to the top of Board (Fascia), and make sure that nothing goes into the roof of the carport - the Dish must be attached to the board only!

The cable must go Directly to the inside of your patio so it cannot be seen in other place outside your home. Satellite Dish CANNOT be directly attached to your home.

Thank you for your cooperation.
